

Digital Native

I. Born 1980-1994

II. Immersed in technology all their lives

III. These people can multitask; however so can people from other generations

IV. Some believe that the nature of education must change completely

A. Personally i feel it does not need to change dramatically; children need to be included in the lesson

V. I feel it is important not generalise about this generation, as not all children have the opportunity to gain these skills

VI. Children are able to use technology at a younger age:

This includes mobile phones, computer games, television, ipods and computers

A. I feel this is because at such a young age children introduced at a younger and younger age. This will can be a benefit to children as they are becoming equip to be successful in the wider community once leaving school
